

## ADOPT A DOCTOR/PROFESSIONAL KIT

Suggested kit content:

- a meeting list
- an A.A. postcard (if your district opted to have them)
- F1 A.A. at a glance
- F2 Information on A.A.
- F8 Problems other than alcohol
- P23 A.A. as a resource for the health care professionals
- P46 If you are a professional

French version of the kit would contain the same items in French (FF1,FF2, FF8, FP23, FP46). It all fits in a regular letter size envelope and we recommend to seal the envelope to ensure that items don't fall out or get taken out by members just wanting one or two items from the kit. These kits are specially intended for members to give their doctors or other relevant professionals only.

Also, we suggest you get an ink stamp and pad made (+/- \$60 ) to stamp the envelope or have a label printed, clearly identifying the kit(see image below). Please make sure to use your district phone number.

The French version could simply have an address label added on front of envelope that reads: Documentation en français (cost saving measure).
